Forecast For Northeast England
Issued by Met Office Exeter
at 0400 on Thursday 14 Jan 2021

++ Valid for broadcast between 0600 and 1800

Headline:
Sleet and snow easing from the east. Icy.

Today:
Outbreaks of sleet and snow will gradually ease from the east coast today. Snow will become lighter, patchy, and mainly focussed over hills later, but with extensive hill fog. Feeling bitterly cold with ice and frost. Maximum temperature 3 deg C (37 deg F).

Tonight:
Rain, sleet and snow should clear all but the Pennines. Cloud will begin to clear in the east leading to a risk of ice, frost and fog later. Bitterly cold. Minimum temperature -6 deg C (21 deg F).

Friday:
Another cold day ahead with hill fog and patchy cloud. Sunny spells are possible but an early frost is likely before clouds build and winds begin to strengthen later. Maximum temperature 3 deg C (37 deg F).

Outlook for Saturday to Monday:
Windy with rain and snow on Saturday, this possibly disruptive. Mainly dry, bright, but cold on Sunday. Dry initially but further rain, snow and strong winds possible later on Monday.
